Integration Checklist

Feature	Status
Job Seeker Login	Pass
Job Seeker Dashboard	Pass

Browse Jobs	Pass
Apply for Job	Pass
My Applications	Pass
CV Management	Pass
Employer Dashboard	Pass
Post Job	Pass
View Applicants	Pass
Application Status	Pass

Integration Problem Discovered

Problem	Fix	Status
CORS error between frontend and backend	Corrected the backend CORS configuration	Fixed
/auth/me returned 401 Unauthorized	Fixed JWT authorization handling	Fixed
Job location filter returned unrelated jobs	Corrected the backend SQL filtering query	Fixed
CV upload failed because of Job Seeker relationship	Fixed the JobSeeker/CV database relationship	Fixed
Application Submission failed during CV upload	Changed the application flow to use saved CVs	Fixed
Employer could see incorrect applicant counts	Corrected the application count returned by the backend	Fixed
Employer access to applicants needed authorization	Corrected the application count returned by the backend	Fixed
Application status could move backward	Added employer/job ownership checks	Fixed
MUI icon import caused frontend error	Added one-way status transition rules	Fixed

MUI accessibility warning appeared on status dropdown	Adjusted dropdown focus handling	Fixed

Postman API Testing Evidence

The main CareerBridge API endpoints were retested using Postman to verify authentication, job management, CV management, and application functionality.

Screenshot 2 — Get Jobs

The screenshot displays the Postman interface for a workspace named "Peniels Larbi's Workspace". The left sidebar shows a collection of API requests under "COLLECTIONS", with "GET Access jobs" selected. The main panel shows the details of this request, which is a GET request to the URL "http://localhost:5138/api/jobs". The "Authorization" tab is active, showing a "Bearer Token" type. The token field is highlighted with a yellow box and contains a masked token. The "Body" tab is also active, showing a JSON response with a status of 200. The response body is as follows:

```
{
  "success": true,
  "count": 22,
  "data": [
    {
      "JobID": 1017,
      "CompanyID": 6,
      "CategoryID": 4,
      "JobTitle": "Accountant",
      "Description": "We want an accountyant",
      "Location": "Tamale",
      "JobType": "Temporary",
      "PostedDate": "2026-09-28T14:29:23.166Z",
      "ApplicationDeadline": "2026-10-10T00:00:00.000Z",
    }
  ]
}
```

The bottom status bar shows the "main" tab is active, and the "Standing by for launch" message is displayed.

Day 15 Reflection

During Day 15, the CareerBridge system improved significantly in both functionality and user interface. The Job Seeker and Employer dashboards were redesigned to look more professional and responsive, while important features such as job management, CV uploading, job applications, applicant viewing, and application status tracking were tested and improved. Several integration issues involving authentication, job filtering, CVs, applications, authorization, and the application status workflow were also identified and fixed.
