

CAREERBRIDGE – DAY 2 ASSIGNMENT

Topic: User Stories, Navigation Structure & Wireframes

Part 1 – USER STORIES

User Stories describe the functions and requirements of the system from the perspective of the different users who interact with it.

A. Job seeker User Stories

As a job seeker, I want to:

- create an account, so that I can have access to the system
- login to my account, so that I can access my dashboard
- view my profile, so that I can see my information and update it.
- upload my CV, so that I can provide my qualifications to employers.
- browse available jobs, so that I can find suitable job opportunities.
- filter jobs by field so that I can get opportunities related to my work.
- apply to a job opportunity so that my application can be reviewed.
- track my applications so that I will know the status of my application.

B. Employer User Stories

As an employer, I want to:

- create an account so that I can have access to the system.
- create company profile, so that job seekers can get information about my organization.
- post job offers so that I can attract qualified candidates for available positions.
- view applicants, so that I can decide on suitable candidates.
- edit a job that I've posted, so that I can update incorrect job information.
- close a job that I've posted, so that I can remove offers that are no longer available.
- view applicants, so that I can see who is suitable for the job.
- shortlist or reject applicants, so that I can manage the selection process effectively.

C. Administrator User Stories

As an admin, I want to

- access a dashboard, so that I can monitor and manage activities on the portal.
- view registered users, so that I can manage their activities on the portal.
- view and access employers' activities, so that I can check for the validation of a company.
- view job postings, so that I can accept or reject certain job postings.
- view job categories, so that I can manage the different fields of work available

PART 2 – NAVIGATION STRUCTURE

The CareerBridge system will have different navigation structures based on the role of the user. Each user role will have access to different features and pages relevant to their responsibilities.

1. Public Website Navigation

The public website is accessible to visitors before they log in.

- Home
- Browse Jobs
- Companies
- Login
- Register

Navigation Flow

Home

|— Browse Jobs

|— Companies

|— Login

|— Register

2. Job Seeker Navigation

After logging in, a Job Seeker will have access to the following navigation menu:

- Dashboard
- Browse Jobs
- My Applications
- Profile
- Logout

Dashboard

- Application Summary
- Recommended Jobs
- Recent Applications

Browse Jobs

- Search Jobs
- Filter Jobs
- Location
- Job Category
- Job Type
- View Job Details
- Apply for Job

My Applications

- All Applications
- Under Review
- Shortlisted
- Rejected
- View Application Details

Profile

- Personal Information
- Education

- Skills
- Work Experience
- Upload/Update CV
- Edit Profile

Navigation Structure

Job Seeker

|— Dashboard

| |— Application Summary

| |— Recommended Jobs

|— Browse Jobs

| |— Search Jobs

| |— Filter Jobs

| |— View Job Details

| |— Apply

|— My Applications

PART 3 – USER WORKFLOWS

1. Job Seeker Workflow

The Job Seeker workflow shows how a user moves from creating an account to applying for a job and tracking the application.

Main workflow

START

Register

Login

Complete Profile

Browse Jobs

Search / Filter Jobs

View Job Details

Apply for Job

Application Submitted

Track Application

END

Browse Jobs → View Job Details

Apply?

No

Yes

Is user logged in?

No

Yes

Login/Register

CV available?

No

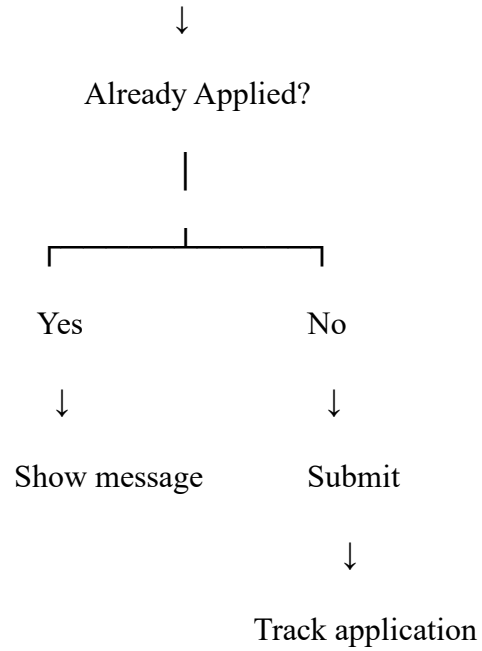

Yes

Upload CV

Apply

2. Employer Workflow

The Employer workflow shows how an employer creates a company profile, posts a job, receives applications, and manages applicants.

Workflow

Register

Login

Create Company Profile

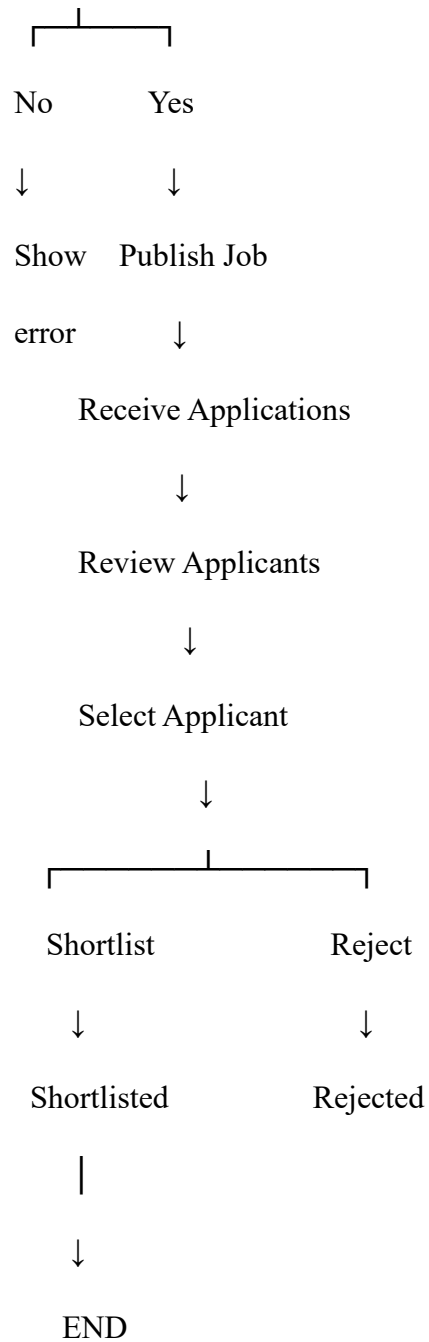

Post Job

Required information complete?

If the employer wantys to edit a job, the employer can go to:

My jobs→ Select Job → Edit Job → Save Changes

If the employer wants to close a vacancy, the employer can go to:

My Jobs → Select Job → Close Job

3. Administrator Workflow

The Administrator workflow is simpler because the administrator mainly manages information in the system.

Main workflow

START

Login

Dashboard

Select Management Area

View Records

Perform Administrative Action

Save Changes

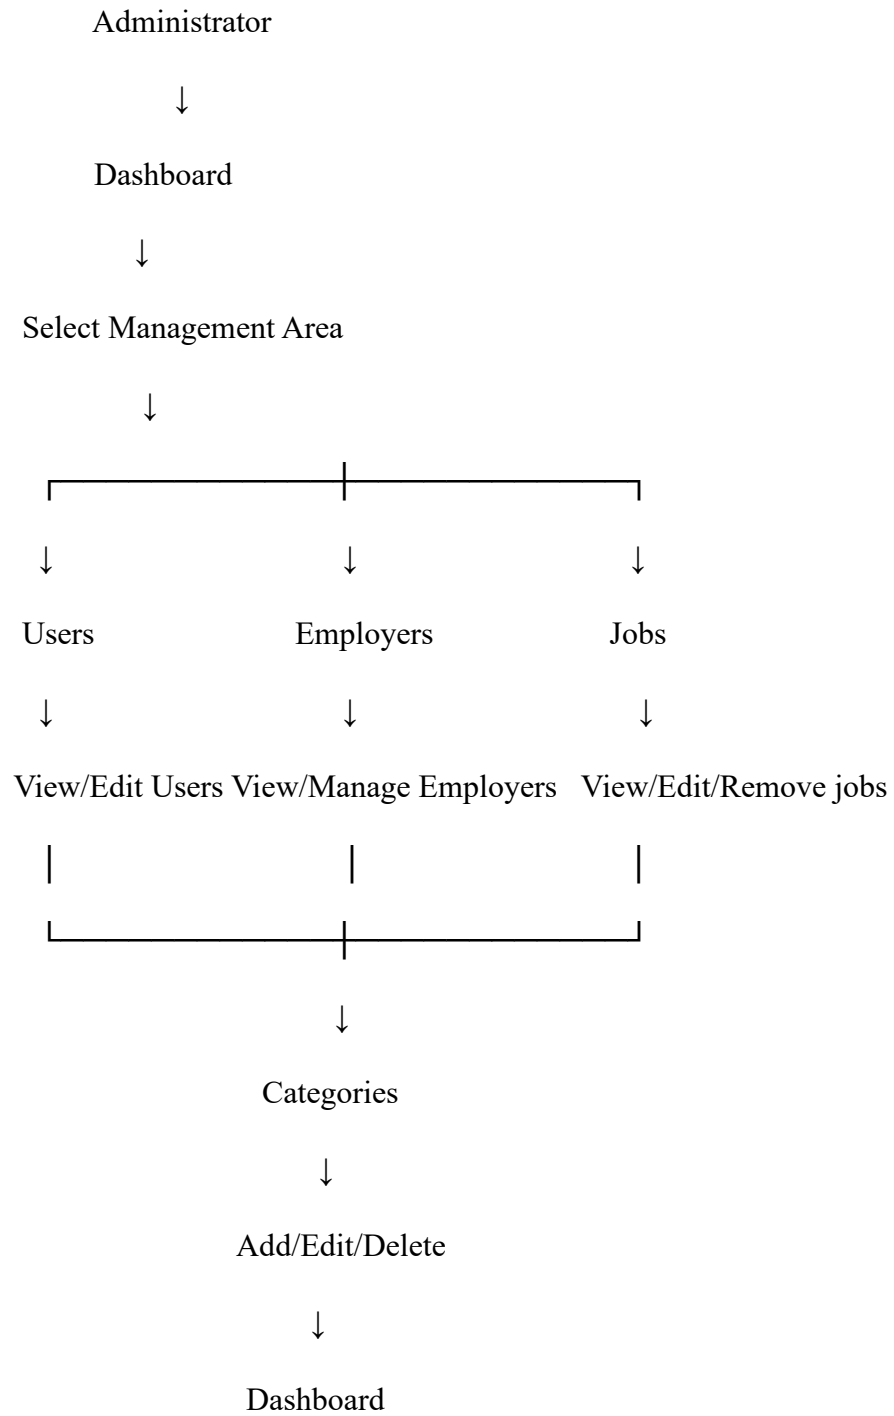

Return to Dashboard

END

Management areas

After selecting the management area, the administrator can choose:

PART 4 – WIREFRAMES

A wireframe is a simple sketch showing the layout of a screen.
